

ACC Transfer Intent Student Survey 2020

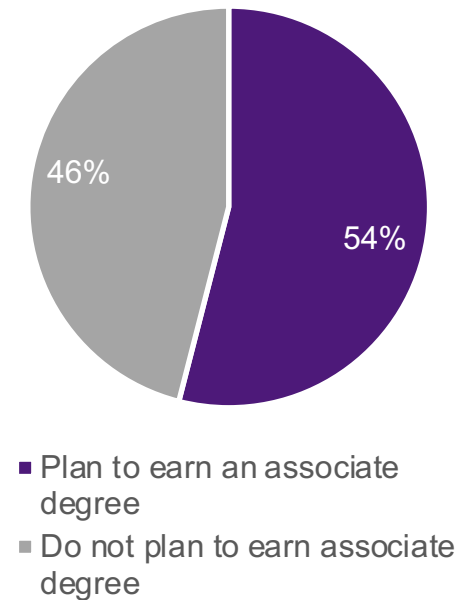

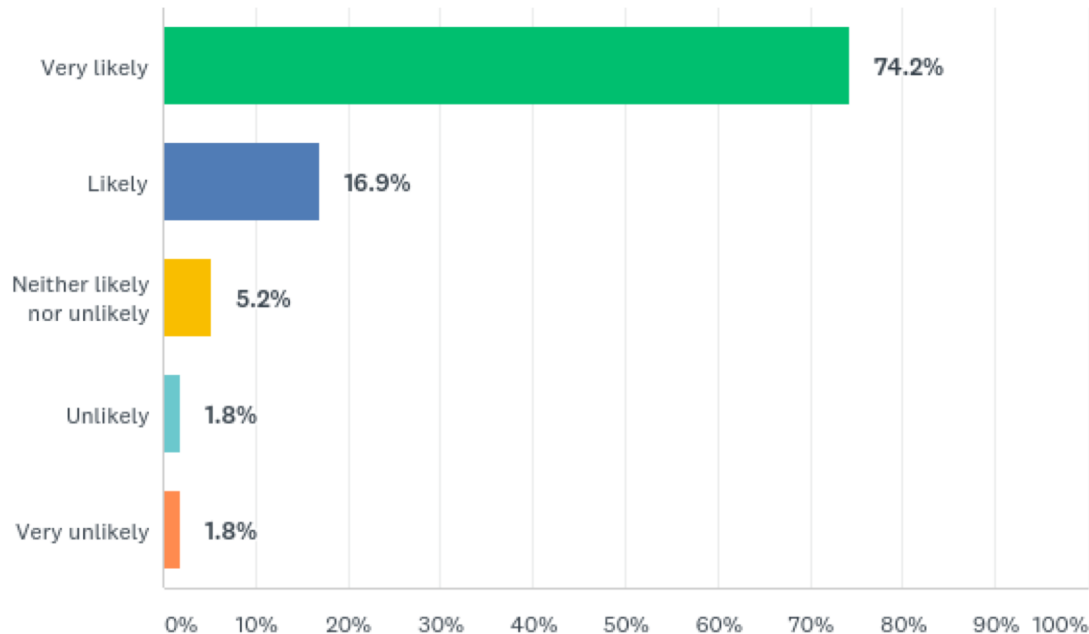

Office of Institutional Research & Analytics

ACC Transfer Intent Student Survey 2020

- Online survey administered Spring 2020 to ACC students enrolled in gateway courses
 - Survey open April 30th - May 10th
- Response rate 12.2%
 - 2,138 responses out of 17,375 students surveyed

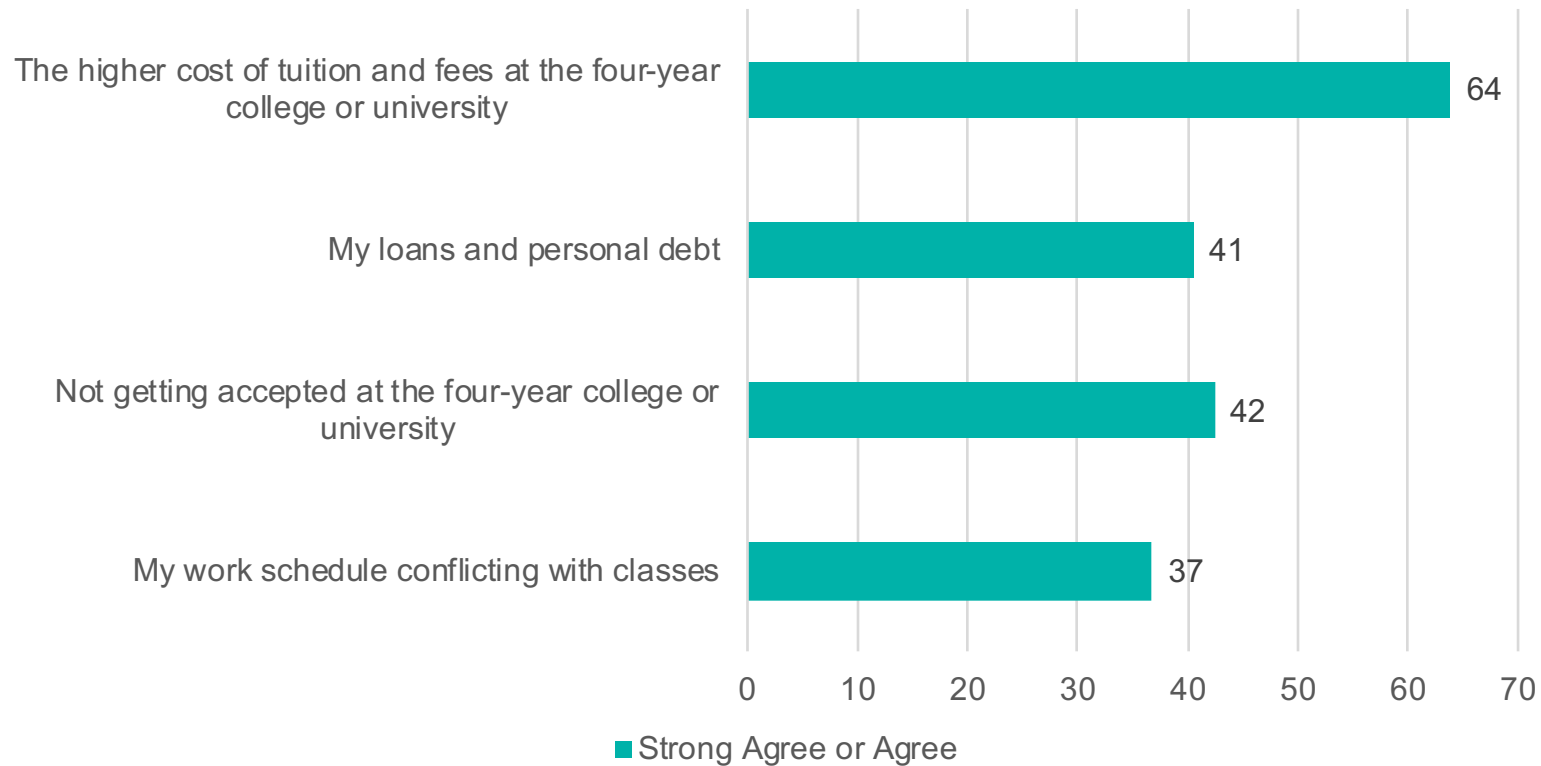

Large percentages of students are interested in transfer. The majority aim to complete an associate degree, as well.

- 94% of students planning to transfer indicated they were likely or very likely to do so.
- 54% of students plan to earn an associate degree prior to transfer.

Students identify costs and debt, admissions, and schedule conflicts as the biggest barriers to transfer.

What might prevent you from attending a four-year college or university?

Students would like more help to navigate the transfer process.

- Regarding what students might need help with,
 - 79% agreed or strongly agreed they need help learning about program specific admissions policies and 75% agreed or strongly agreed they need help learning about general admissions policies at 4-year institutions
 - 74% agreed or strongly agreed they need help with completing their application
 - 71% agreed or strongly agreed they need help to meet with an ACC transfer specialist

COVID-19 is changing students' plans for transfer.

- 43% of respondents indicated that the COVID-19 pandemic impacted their transfer plans.
- Affected students plan to spend more time at ACC, to take fewer courses, or to delay transfer.
